Nuclear Detonation Safety: Food, Drinking Water and Medicine

Food Safety

Food already indoors or food in containers from the outside that have been wiped off is safe to eat. Do not eat fresh food from a garden.

Drinking Water Safety

Stay hydrated. Bottled water or sealed beverages are best. Water from your toilet tank (not bowl) and water heater is also safe. If those are not available, then tap water should be used to stay hydrated.

Life Sustaining

Medicine Safety

Continue taking your medication. Medicine already inside or medicine in containers from the outside that has been wiped off is safe to consume.

Cleaning Instructions

Use a damp towel or cloth to clean all containers, utensils and surfaces. Seal these cleaning cloths and place them away from pets and people. Wash your hands after cleaning.
